

OCTOBER 2026 Preschool Activity Calendar

Bismillah! Let's Explore Allah's Amazing Creation! 🌿

This October, join us as we explore the beautiful world Allah has created! Enjoy simple, hands-on activities designed for preschoolers and their families as we learn about Al-Khaliq (The Creator), practice gratitude, and discover ways we can care for Allah's creation.

Grab your little explorer and let the autumn adventures begin! 🍁

SUNDAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY
				Autumn Nature Walk Take a family walk and look for signs of autumn. Talk about the colors, leaves, trees, and weather. Say Alhamdulillah for the beautiful world Allah created. 1	Fall Color Hunt Search inside or outside for things that are red, orange, yellow, and brown. Count how many of each color you find. 2	Leaf Art Collect a few leaves and make leaf rubbings with crayons. Notice their different shapes, sizes, and patterns. 3
Allah Made the Animals Look through an animal book or pictures and name different animals Allah created. Practice saying, "SubhanAllah! Allah made the animals!" 4	Move Like an Animal Hop like a rabbit, waddle like a duck, crawl like a turtle, and flap like a bird. Let your child choose animals for you to imitate too! 5	Animal Home Match Talk about where animals live. Match animals with their homes: bird-nest, bee-hive, rabbit-burrow, fish-water. 6	Bird Watching Spend 10-15 minutes watching birds outside. Count the birds you see and notice their colors, sizes, and sounds. 7	Build a Bird Nest Gather twigs, leaves, grass, and other safe natural materials. Try building a pretend bird's nest together. 8	Feed the Birds Put out some birdseed and observe which birds visit. Talk about being gentle and kind to Allah's creatures. 9	Favorite Animal Art Draw, paint, or craft your child's favorite animal. Ask: What do you love about this animal? 10
Weather Watcher Look outside together. Is it sunny, cloudy, rainy, or windy? Draw today's weather. 11	Cloud Watching Lie outside or look through a window and observe the clouds. What shapes can you find? 12	Wind Experiment Take lightweight objects outside—a leaf, feather, tissue, or ribbon—and see what the wind can move. 13	Make a Windsock Create a simple windsock using paper and streamers. Hang it outside and watch which direction the wind blows. 14	Rain in a Cup Experiment Make a simple rain-cloud experiment using a clear cup of water, shaving cream, and a few drops of food coloring. 15	Weather Dress-Up Call out different weather conditions and let your child choose what they would wear. What do we need when it's raining? What about when it's hot? 16	Alhamdulillah for Rain Talk about why plants, animals, and people need water. If it rains, watch it together and say Alhamdulillah for this blessing. 17
Learn Al-Khaliq Introduce Al-Khaliq — The Creator. Walk around your home or outside and identify things Allah created. 18	Allah Made / People Made Sort pictures or objects into two groups: Allah Made It and People Made It. For example: tree, flower, cat vs. chair, car, cup. 19	Creation Collage Cut out pictures of animals, plants, mountains, oceans, and other parts of nature. Glue them together to create an "Allah's Amazing Creation" collage. 20	Plant Something 🌱 Plant a seed together. Talk about what plants need to grow and how Allah causes living things to grow. 21	Nature Counting Collect safe natural objects such as leaves, rocks, or twigs. Count them, sort them, and compare which group has more or less. 22	SubhanAllah Nature Art Paint or draw something beautiful from nature. Write SubhanAllah at the top and display your child's artwork. 23	Creation Scavenger Hunt Use our October Faith & Fun scavenger hunt to search for some of Allah's wonderful creations. 24
Clean Up Allah's Earth With an adult, pick up safe litter around your yard, park, or neighborhood. Talk about keeping our surroundings clean. 25	Reuse & Create Turn something recyclable—a cardboard box, paper roll, or clean container—into an art project. 26	Be Kind to an Animal Do something gentle for an animal today: refill a bird feeder, put out fresh water, or carefully observe an insect without disturbing it. 27	My Blessings Tree Draw a tree and add paper leaves. On each leaf, draw or write something your family is thankful to Allah for. 28	Alhamdulillah Walk Take a short walk. Each person takes turns naming something they see that makes them say Alhamdulillah. 29	Creation Sensory Bin Make a nature-inspired sensory bin with safe items such as leaves, pinecones, sticks, rocks, or toy animals. Explore textures, sizes, and shapes. 30	Finish the month by looking back at your child's October crafts, pictures, and activities. Ask: "What was your favorite thing Allah created that we learned about this month?" Celebrate with a favorite family snack and say Alhamdulillah for a wonderful month together. 31
